## EDUCATION

**Computer Science Bachelors**, *Moradabad Institute of Technology* 09/2022 – 06/2026  
CGPA: 7.5 Moradabad

## Experience

**Backend Developer Intern**, *MetaSquare Technologies Pvt. Ltd* 06/2025 – 08/2025  
Gurgaon, India

- Built and deployed **RESTful APIs** with **FastAPI**, optimized MongoDB, and implemented **JWT authentication**.
- Deployed backend on **Hugging Face Spaces**, frontend on **Render**, and integrated **third-party APIs**.
- Improved API performance with **asynchronous processing**, reducing response time by **40%**.
- Wrote unit tests and **Swagger documentation**.

## SKILLS

### Programming Languages

Python, Solidity

### Libraries/Frameworks

FastAPI, Web3

### Tools / Platforms

Git, GitHub, VS Code, Docker, Postman

### Databases

MongoDB, MySQL

## PROJECT

**FactifyAI**, *AI-Powered Fake News Detection System* 07/2025 – 08/2025

- Built full-stack system using FastAPI, MongoDB Atlas, and Hugging Face Transformers to classify news as FAKE or REAL (95%+ accuracy).
- Integrated ClaimBuster, Google Fact Check, WHOIS APIs; added JWT + OAuth, rate limiting, and sentiment analysis.
- Deployed backend on Hugging Face Spaces, frontend on Render; developed browser extension with summarization & text-to-speech.
- **Live:** [factifyai-frontend.onrender.com](https://factifyai-frontend.onrender.com) 🖱

**Decentralized Voting Application**, *Blockchain-Based Secure Voting System* 09/2025 – Present

- Built a tamper-proof voting system using **Solidity** and **Ethereum Smart Contracts**, enabling secure voter registration, candidate management, and real-time vote counting.
- Integrated the smart contract with a frontend using **Web3.js**, ensuring transparency, immutability, and prevention of duplicate or fraudulent votes.
