### SUMMARY

8+ years of extensive experience in designing and developing web applications, web services, client/server applications by using Microsoft .NET technologies. Having strong knowledge Software Development Life Cycle (SDLC) including requirements definition, design, programming / testing and implementation of major systems.

### SKILLS

Microsoft .NET , Programming / testing.

### WORK EXPERIENCE

#### Dotnet Developer

ABC Corporation - November 2010 - August 2011

- Analyzed requirements in order to determine and provide realistic estimates and Solutions.
- Designed dynamic web pages with C# using RAZOR in ASP.NET.
- Developed Presentation layer using ASP.NET, HTML, JavaScript.
- Implemented MVC design pattern to develop the application and to reduce the complexity and to get full control over the behavior of the application.
- Worked with Telerik Controls to display huge amount of data.
- Used Ajax Controls for client side validations with asynchronous data execution using threads when needed to increase the performance.
- Developed Cascading style sheets (CSS) for consistent look and feel of the website.

#### Dotnet Developer

Delta Corporation - 2006 - 2010

- Created ASP.NET pages with web server controls for the presentation layer.Implemented validation using validation controls, JQuery and JavaScript client side validations.
- Developed web applications using ASP.NET and AJAX Extensions Under MVC architecture.
- Created Web Forms for developing the applications using webserver controls and HTML controls.Using Entity Framework, connected to relational data by writing LINQ to SQL queries.
- Involved in all the phases of the Software Development Life Cycle including System Analysis, Design and Development.Implemented Page level security and permissions based on the authentication details.
- Developed administrative functions such as assigning property viewing permissions and adding system users.Using Windows Forms for GUIs with some test work with Crystal Reports html for reporting.Written Web Service for Messaging module passing user data from Manager to Sales Team and vice versa using C#.Net.Send ADO.NET datasets through XML Web service.Presenting the data from the XML file by using XSLT.Designed reports and written some dynamic calculations for reports using SQL Server Reporting Services.
- Provided technical support and updates to customers and partners in a timely manner and documented technical and programming specifications.Data Formatting was done using HTML, CSS and client side scripting using AngularJS and JQuery.Involved in the development of business logic in C#.
- .NET.Created web custom controls and web user controls where necessary.
